Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-8, 11, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maurer in view of Cavalli '216. Maurer discloses an ice cream maker including a mixing blade 5 and spring means 14 which subjects the mixing blade to an axial thrust which keeps the scraper pressed on the bottom of the inner container. However, Maurer does not disclose the evaporator coil located on the bottom of the inner container. Cavalli '216 teaches an ice cream maker having an inner container and an evaporator coil 9 located on the bottom of the container. It would be obvious to substitute, for the cooling means 2 of Maurer, an evaporator coil located on the bottom of the container, for the purpose of providing a more efficient cooling means for the freezer. The shapes of the mating surfaces of the bottom of the container and the evaporator coil are considered to be matters of obvious design choice to one of ordinary skill in the heat exchange art, because no criticality or unexpected results are seen or have been disclosed for the various shapes of mating surfaces recited in claims 3-5. Also, the ratio of the height to diameter of the container is considered to be a matter of obvious design choice to one of ordinary skill in the art, as again no criticality or unexpected results are seen or have been disclosed for the recited ratio of from about 0.30 to about 0.50 in claim 6.

3. Claims 9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of

the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure.
